

Water Splash, Inc.
is an innovative water playground
equipment manufacturer founded in 2003 by a
team of engineers who put their skills at the heart of their
enterprise, with an emphasis on continuous product improvement
through research and development. Our team has a total of 15 years
experience in the design and manufacture of splash park equipment.
We provide products for splash pads, spray parks/spray grounds and
swimming pools. We have a strong engineering and customer care
group that will provide the technical support you need at every stage of
your project. Our durable and reliable products come with timely and
personalized customer service, and they're factory-assembled and -tested
to reduce your installation costs.

Backed by some of the strongest product warranties in the industry and
an unparalleled safety record, Water Splash is rapidly becoming the
benchmark for top-quality splash pad products.

Water Splash products are designed and manufactured to meet two basic criteria; fun and safety. Only the finest materials are used in the construction process, to ensure that maximum safeguards are incorporated into every design. To this end, all manufacturing and tooling takes place in-house, and all products conform to or exceed ASTM F1487, ASTM F2461, SS 457, CSA Z614 and EN 1176 standards. Our in-house engineering and manufacturing expertise also provide our customers with another advantage: complete customization, to suit any and all of their needs.

- All metal products are made of 304/304L stainless steel material.
- Nozzles, water openings and sprayers are made of C360 brass material.
- Water Splash provides special tamper-resistant tools. All products are offered with winter caps.
- The painted finish of all equipment is a high-quality, UV-resistant powder coating of oven-cured glossy polyester, with stabilizers and chlorinated water resistance.
- Spray nozzles are recessed, welding marks are invisible (buffed and polished) and equipment is pressure tested for leakage.
- Products comply with the ADA (Americans with Disabilities Act) and CDA (Canadians with Disabilities Act).

Splash Parks & Water Management System

6

watersplashnet.com

01**Inground Features****02****Above Ground Features****03****Activator**

Activator is a sensor unit; kids interact to activate play function of Splash Park. Activator sends a signal to Water Wise controller and play features starts functioning.

04**Drain**

Drain is located in several location of splash park in order to collect all water in play area to storage tank.

05**Storage Tank**

Storage tank is a container where drain from Splash Park connects to. Water stored in constantly filtered by Water Management System.

06**Water Wise Controller&Manifold**

Water Wise Controller is brain of Splash Park, and controls Water Management System components and manifold valves. Manifold is the connection to each play equipment, and operates on/off linked to Water Wise controller.

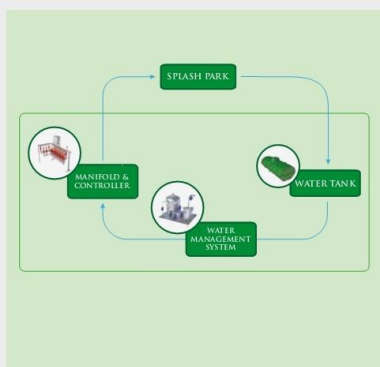

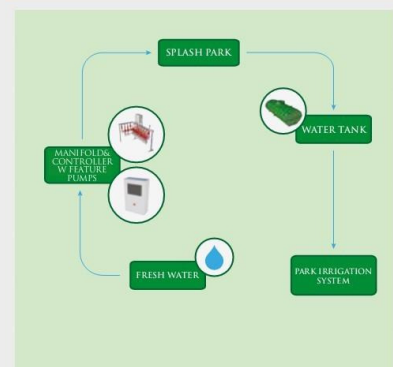

07**Water Management System (WMS)**

Factory assembled and tested, skid mounted Water Management System (WMS) is an engineered system for Splash and Aqua Parks. Each system is unique and meets local health code of project location. Water stored in holding tank is constantly filtered by WMS.
