Single-casing aluminum cast spheres with anti-corrosion treatment are placed at junctions. These spheres are designed with integrated bedding for connecting pipes.

High quality panels made of HDPE panels are milled to provide a smooth, gently rounded edge. The thickness of the panels varies according to its purpose for floors, roofs, and walls.

Metal parts are comprised of ST 37 Steel with a 3-step metal finish. Sandblasting and solvent-free zinc primer coating and electrostatic powder paint application is inherently corrosion resistant under extreme weather conditions and UV.

CmrRope[™] is formed by 6 strands of galvanized wires and a core either steel or fiber. Each strand is tightly braided with Polyester which is adhered to galvanized wires with a patented method to create a solid surface where polyester meets with wires. So extra protection is achieved against friction and vandalism. Surface is extremely abrasion and UV resistant also fire retardant.

Tek parça alüminyum döküm konektörler, ipin hareket etmesini ve erken aşınmayı önlemek için 300 ton pres ile sıkıştırılmıştır. "Sonlandırıcı konektör" keskin açı veya kenarlar bulundurmaz ve iyi bir kavrama sunar. Bu konektörlerin ana çerçeveye bağlantısı kaynaklı flanşlar ya da "C" alüminyum kelepçelerle yapılır.
