

GEO GROUP / **WITCH SERIES**

GGWS 1004

CMRPLAY [®]	
Product Information	
Dimensions (L x W x H)	: 8,6 x 3,95 x 3,7m
Age Group	: 2+
Capacity	: 20
Fall Height	: 0,95 m
Safety Area	: 60,3 m ²

WITCH SERIES

Witch Series is a product group based on the climbing function which plays a major role in children's physical and mental development. It aims to attract children's curiosity to discover thus witch theme and witch house concepts were used for this purpose. In order to create the sensation of a witch house, the graphics on the product are designed and produced in a way to support the theme.

Single-casing aluminum cast spheres with anticorrosion treatment are placed at junctions. These spheres are designed with integrated bedding for connecting pipes.

Durable and weatherproof laminated Plywood is used at platforms. These platforms have ability of anti-slip feature to increase the safety of the users.

Metal parts are comprised of ST 37 Steel with a 3-step metal finish. Sandblasting and solvent-free zinc primer coating and electrostatic powder paint application is inherently corrosion resistant under extreme weather conditions and UV.

CmrRope[™] is formed by 6 strands of galvanized wires and a core either steel or fiber. Each strand is tightly braided with Polyester which is adhered to galvanized wires with a patented method to create a solid surface where polyester meets with wires. So extra protection is achieved against friction and vandalism. Surface is extremely abrasion and UV resistant also fire retardant.

High quality panels made of HPL panels are milled to provide a smooth, gently rounded edge. The thickness of the panels varies according to its purpose for floors, roofs, and walls. These panels are connected to steel pipes or profiles with cast aluminum panel clamps or flanges. To increase the visibility of interior of the equipment, some panels are equipped with 5 mm thick anti-climb steel meshes. This wire mesh is placed within either steel or HPL frame.

This slide type is very resistant to wear and tear remaining in mint condition for years. Stainless steel material is 2 mm thick. Approved product according to EN 1176 norms. Sides of the slide is HPL or HDPE with rounded edges.
