Dreams Come True...

Brands, designs, models, petty patent and patent rights are belong to Cemer Kent Ekipmanları San. ve TİC A.Ş. Cannot be copied partially or completely and cannot be used for commercial purpose. Intellectual property rights of the products in this catalogue only belong to Cemer Kent Ekipmanları San. ve TİC A.Ş. If there is any act contrary to these rights, there will be legal and penal sanctions.

## ■ ABOUT US

As Cemer, we have been manufacturing children playground equipment as well as urban equipment within 45.000 square meters with over 300 talented people in Izmir.

Since we started to operate, quality and design have been our main priority. Our designs are implemented through not only tracing the new developments in the World, but also the changing needs of our children by time.

Scientific researches on games and playgrounds have put forward the importance of free play for children of future to establish a physically and mentally healthy community. On the contrary, children today are spending the most of their valuable time either in front of computer or on mobiles which we know their bad attitude is going to bring out some disease and inconveniences in near future.

In recent years, with increasing social awareness and the developing the social municipality perception, new designs which shall draw the children's attention to the playgrounds have come into prominence again.

We have been aiming to meet all the needs of the sector even to be one step ahead by reserving 20 % of our income to R&D department where 30 talented people are working on many different innovative products for many years.

In this catalogue, we have composed a variety of attractive playground equipment which have been designed and produced after considering its contribution to our children's mental and physical development.

We have dreamed...

Now, bringing it to life...

## CERTIFICATES AND MEMBERSHIPS

INTERNATIONAL FEDERATION OF SPORT CLIMBING

EUROPEAN ROPES COURSE ASSOCIATION

INTERNATIONAL MOUNTAINEERING AND CLIMBING FEDERATION

INTERNATIONAL ASSOCIATION OF AMUSEMENT PARKS AND ATTRACTIONS

## CONTESTS & AWARDS

Cemer's innovative product called “Deltoik Modular Climbing Unit” was awarded by the world-wide known Design Award Competition “Reddot Design Award” in 2014 and became the first company having an award in this sector which was followed by German Design Award in 2017 “The Best Design in the sector” out of 4815 different projects and 53 different countries.

### 1st TRADITIONAL DREAMS COME TRUE DESIGN COMPETITION

As an organization having faith in the importance of design, we set up a game group design competition in 2014 in order to be able to create sector awareness, to draw the attention of young designers and to increase the design variety in the game group industry.

### 2nd TRADITIONAL DREAMS COME TRUE DESIGN COMPETITION

In 2016, we organized our second “Dreams come True” design competition with the theme “Playgrounds of the future”. Our purpose was to show and prove the importance of designs, R&D, Innovation in production as well as compete with the world-wide known companies and create more competitive production field. We also would like to contribute to raise new golden generations by saying that “We are also in the designs too”

# Material

## Metal Colour Choices

1. Yellow (RAL 1003) 2. Turquoise (RAL 5018) 3. Red (RAL 3020) 4. Window Grey (RAL 7040)
5. Green Blue (RAL 5001) 6. Yellow Green (RAL 6011) 7. Signal Brown (RAL 8002)
8. Black Grey (RAL 7021) 9. Black Gofrato (RAL 9005) 10. Granite (Grey RAL 7026)
11. Pastel Blue (RAL 5024) 12. SW306 G

\* Actual product colours may slightly vary from the mentioned RAL codes. Colours can be verified by ordering a sample from our Site

## Polyethylene Colour Choices

## Rope Colour Choices

## METAL

Material substances consist of durable and high quality metal parts which are manufactured at our own facilities with high tech tools. As carries beams ST 37 Carrier posts; as connector aluminum and steel casting parts are used. Sizes, thicknesses, wall thicknesses and density of these metal parts are set according to static calculations. Finish of the main beams are as in order of shot blasting, zinc-rich primer coating and powder coating.

## POLYETHYLENE

Plastics used on our playgrounds are mainly species of polyethylene such as, LLDPE ( Low linear density polyethylene) MDPE ( Medium density polyethylene) and HDPE ( High density polyethylene) Each of these are used according to product design and safety of the products. %100 recycled LLDPE and MDPE are processed on roto molding and plastic injection machines inside aluminum and steel molds.

## COMPOSITE COATING

Cemer has created a new style of natural playgrounds called composite coated playgrounds. For this line of playgrounds, main carrier metal beams are coated with wooden composite material to give them natural appearance and durability without forest lumbering. This special composition is made of wooden chips, polyethylene and binder. As well as everything else used at the products this composite material has been tested according to European norms for its chemical ingredients and marked as safe.

## ARMED ROPES

Armed ropes are manufactured with diameter of 16, 18, 20 mm. Both steel core and fiber core ropes in each diameter can be manufactured at our own facility. Each rope is made of 6 strands and these strands are made of UV stabilized, flame retardant and braided nylon (Polyamide 6) ropes on steel wires.

## CONNECTOR

Connectors may vary in material as Steel, Aluminum, metal or Plastic. Each of the connectors has been designed for ergonomic and safe use and these connectors maintain the characteristic of the product type used as well as the visual and structural integrity.

## STAINLESS STEEL

with recent upgrades CMR play offers stainless steel slides for playgrounds manufactured in our factory. Currently Stainless steel grade 304 is used but upgraded versions are also available on request.

# Rope Courses

## ■ About Rope Courses

It is time to try something different to get you out of the house and getting some exercise. High rope courses may not be the first thing that comes to mind when thinking about ways to get some exercise, but it could be just the activity you are looking for. Your body will get a full workout, and your mind will thank you for it too.

High rope courses are a fun and exciting way to get outdoors and get some exercise, something that many or use lack enough time for in our modern lives. Finding an energetic activity that you actually like to do means that you will not see it as a chore that you have to do, but instead something you genuinely want to do. Your body will benefit from an all-round workout while navigating a high ropes course.

You will raise your heart rate significantly while overcoming the obstacles on a high rope course, and the element of risk will make your heart make even faster. Next, let's consider the use of muscles. Your upper body strength will improve with regular sessions on a high rope course, and this is where most of the work takes place. Your hands, arms and shoulders will all be aching after your first time, but your muscle strength will improve dramatically over the space of just a couple of months if you take on a high ropes course twice a week.

Try to the high ropes course. Being high up in the air, you will need to stay focused, balanced and concentrate on completing the obstacle at hand. Your balancing muscles are located in your back, abdominals and along your spine and many recreational activities overlook these muscle groups. Strong core muscles will help you stay flexible, injury-free and well-balanced.

Besides individual satisfaction, negotiating a high ropes course with a group or your team can have some great mental health benefits too. Leadership skills can be realised in someone who never thought they had them and the whole team can learn to trust one another more when they help one another to conquer their fears.

The great thing about the high ropes is that anyone can do it, young and old and it provides a fun way to get fit. A healthy body and mind is something that everybody has the right to deserve, being surrounded by nature, exercising both your body and mind and having fun detoxing your body.

The wide ranging physical and mental health benefits of completing high rope courses make them a perfect activity for anyone who wants to get into and stay in shape. A fun activity that is as good for your body as it is for your mind, if you are looking for a way to improve your fitness and boost your confidence then reach for the elements and try a high ropes course.

# Climbing Walls

Standards for climbing walls:  
European and Turkish standards TS EN 12572  
IFSC: International Federation of Sports Climbing

## ■ Climbing and Climbing Walls

Sport climbing which has modern, innovator and active identity is accepted as sport of the new century in the World. Climbing wall is formed by holds placed on polyester or plywood panels and this polyester panels or plywood panels are build on steel constructions. For each level of user many routes in different difficulty levels on these walls can be created by adjusting number or dimension in-between holds and changing aim of the wall.

Climbing walls has come up to practice climbing where there is not much availability of traditional climbing activities. Afterwards all people intrested in this sport including adults and children started to use.

### **Benefits**

When it comes to climbing it is commonly supposed that this sport requires strength and power first. Actually before power and strength, climbing starts with balanca, flexibility, decision making, self confidence and determination. Climbing has positive effects on users especially children. Climbers work out each muscle group in their body. After some researches on Climbers, it come out that people keep in climbing training has better accurate and quicker decision making under pressure, stress management, overcome with acrophobia, endurance to hard circumstances, problem solving, making strategies, planning, socializing, self confidence, ingenuity and increase in mental power. A climbing child first plans where to hold where to step then executes plan accordingly. Every step higher, very meter climbed a child gains more self confidence and with each step always aims higher.

### **Safety**

Climbing with safety equipment and "Personal Protective Equipment" according to EN and CE standards and accredited by IFSC( International Federation of Sports Climbing ) has minimum risk contrary what is believed. With all safety measurements climbing can be executed with zero risk. That's why if you compare sports climbing with other branches of sports it is among the lowest risk sports.

### **True Blue Auto Belay**

Technical Specifications:

Models: 12.5 - 20 m

Rated Working Capacity: 15 kg - 150 kg

Device Weight: 19.75 kg

Max - Min Mounted Height: 12,5 m - 7,5 m

Max descent speed: 2m/second

Nylon Runners: 15.6 KN

Ce0194 EN 341:192 + A1:1997 Classs A

### **Climbing and Muscles**

Physical contributions of this sport are approved by all sport authorities in the world. During climbing trapezius, shoulder, biceps, triceps, fore arm, fingers, abs, back and calf muscles are used actively.

### **Essential of Climbing**

Climbing is based on puzzles. In climbing activity what really matters is to climb same wall by using different routes and to increase difficulty in each climb. In essential of climbing there is no climbing fast but using the hardest way that sportsmen can handle. As difficulty levels and routes can be changed this sport fits to many different users from different age groups.

# Free Fall

## ■ About Quick Jump

True free fall feeling.

The quickjump Free Fall Device provides an exciting elements with high throughput and low operational costs to operators of amusement parks, family entertainment centers, adventure parks, shopping centers, resorts, ropes courses and more . The quickjump gives the rider the feeling of a free fall, while comfortably controlling their descent. Free fall device notably: existing adventure structures like ropes courses and climbing towers.

- Totally Interactive
- Exciting and Safe
- Unique Experience
- Innovative Technology
- Simple to Understand
- Powerful Learning!
- Experiential Science
- Enable participants to experience a sense of success and adventure
- Create trust and mutual support within teams
- Increase a participant's confidence and self-esteem
- Create fun, enjoyment and laughter
- Improve problem solving, decision making and risk taking strategies
- Develop agility and physical co-ordination

# Zipline

Using a zip-line can be quite exciting, especially if it is long as people can built up quite a head of steam, travelling very rapidly along the zip-line. Because zip-lines come in an array of lengths and heights, it is possible for people of all ages to enjoy zip-lines, from young children who might prefer a short, low, backyard zipline to experienced adventurers who want something a bit more exciting. Ropes courses and orienteering challenges often have zip-lines as well, of varying lengths and heights.

A zip line is used in a range of sports from mountaineering, to sport climbing, technical tree climbing and water crossing..

Adventure challenge or ropes courses have zip lines as part of their high ropes elements.

Ziplining is a great way to stay active, observe nature and have the time of your life. Even if you have a fear of heights, you can face them with ease ( going down each zip I felt 100% secure ). I wasn't sure if I would like zip-lining, but now I'm hooked! The best thing is that zip-lining is an easy way to exercise and have fun. You don't need to be a fitness buff to do it; it is an activity open to all ages! Zip-lining is a smooth and exhilarating way to observe nature with a bird's-eye view, so why not try it?

Karapürçek Village Park

# Skate Park

■ The planning and design of our Skate parks that given particular importance to its safety with long life use is carried out by experienced and expert teams.  
All steel components are manufactured by hot dip galvanize.

Product handrails consist of 1.5 "edge pipes 1.5" pipe constructions.

Classification of the sliding surfaces of our skateboard platforms is C40, and the concrete classes of other sections are C30.

Our skateboard platforms' construction steel class is St 3 a. (Natural hardness, superior quality steel)

On the sliding surfaces of skateboard platforms; concrete paraffin based evaporation reducing curing material is used. This process is increasing the surface resistance, which is sheltered.

On the ramp edges of our skateboard platforms 40 \* 40 \* 4 angle brackets are used.

Especially designed for users free sliding, socializing and improvement their skills.

A diagram of a rectangular field with a total length of 10 m and a width of 3 m. The field is divided into three equal rectangular plots by two vertical lines. Each plot has a length of  $\frac{10}{3}$  m and a width of 3 m.

Diagram of a rectangular window divided into two horizontal panes. The total height is labeled as 4.2 m.

A diagram showing a rectangular area with a width of 2.5 m and a height of 0.5 m. The rectangle is divided into two sections by a vertical line, with the left section being shaded.

Diagram of a rectangular field with a triangular section removed. The total width is 6 m and the total height is 4 m. A dashed line indicates the diagonal of the removed triangle.

# Bumerang Series

Bumerang series are the concrete urban equipment that made up with two different modules (multipliable) that formed consecutively. In this series, we aimed to design a product group that offers users the opportunity to meet and socialize in the communal areas. Different combinations are available depending on the number of modules.

# Modular Series

Modular series , in conformity with its meaning, are the urban equipments that can be combined with each other. Main purpose of this design work is to create communal areas with the functionalization of cubic forms to use the resultant gaps. Modular series give the opportunity to make different combinations in accordance with the landscape of workspace and the need of usage.

# Poly Planters

## Specifications

- Rigid for bumping and crashing
- Uv resistant
- Available for 4 seasons
- Recyclable material
- Metal parts galvanised coating and electrostatic painting
- Optional colors

**1** - Rounded surface helps plant to grow up without any damage.

### **2 - Thermal Isolation**

The airspace between double walls provides thermal isolation.

### **3 - Water Depot**

Reduces watering frequency needs and prolongs plant life.

### CSD 100

Dimensions: 100 x 27 x 29 cm.  
Weight: 7 kg.  
Soil Capacity: 40 lt.  
Water Capacity: 4 lt.

### CSD 140

Dimensions: 140 x 45 x 25 cm.  
Weight: 10 kg.  
Soil Capacity: 92 lt.  
Water Capacity: 13 lt.

### CSD 145

Dimensions: 145 x 80 x 25 cm.  
Weight: 17,5 kg.  
Soil Capacity: 182 lt.  
Water Capacity: 25 lt.

### CSY 45

Dimensions: 45 cm.  
Weight: 2 kg.  
Soil Capacity: 14 lt.  
Water Capacity: 2 lt.

### CSY 60

Dimensions: 60 cm.  
Weight: 5 kg.  
Soil Capacity: 24 lt.  
Water Capacity: 4,5 lt.

### CSY 80

Dimensions: 80 cm.  
Weight: 6,5 kg.  
Soil Capacity: 75 lt.  
Water Capacity: 6 lt.

### CSYY 65

Dimensions: 65 cm.  
Weight: 4,75 kg.  
Soil Capacity: 15 lt.  
Water Capacity: 2,5 lt.

### CSYY 85

Dimensions: 85 cm.  
Weight: 5,5 kg.  
Soil Capacity: 45 lt.  
Water Capacity: 4,5 lt.

CES 005

Height: 280 cm.  
Width: 140 cm.  
Pillar: Ø90 galvanize  
Pots: one of CSY 45, CSY 60,  
CSY 80 seven of CSY 65

CES 005

Height: 255 cm.  
Width: 160 cm.  
Pillar: Ø90 galvanize  
Arms: Ø34 galvanize  
Pots: six of CSY 45

CES 007

Height: 275 cm.  
Width: 160 cm.  
Pillar: Ø90 galvanize  
Arms: Ø34 galvanize  
Pots: ten of CSY 45

CES 008

Height: 96 cm.
