

Cemer®

SPIDER GROUP SGM 1028

Metal pipes and other metal parts are comprised of ST 37 Steel with Metal finish; Sandblasting and treated with solvent-free zinc primer coating which is inherently corrosion resisted under extreme weather conditions and UV.

Mats shall be 3-layer textile-reinforced flexible rubber and they are fixed to armed ropes with polyamide connectors either to close entrapments or to create seats and trampolines.

This slide type is very resistant to wear and tear remaining in mint condition for years. Stainless steel material is 2 mm thick. Approved product according to EN 1176 norms.

CmrRope ™ is formed by 6 strands of galvanized wires and a core either steel or fiber. Each strand is tightly braided with Polyester which is adhered to galvanized wires with a patented method to create a solid surface where polyester meets with wires. So extra protection is achieved against friction and vandalism. Surface is extremely abrasion and UV resistant also fire retardant.

Sandblasted – solvent free zinc primer treated, and powder coated ST 37 metal anchor contains multiple connection points to allow adjusting and connection of the safety rope. For main mast, a cocoon shall be placed in the center. This two parts assembly allows less pressure to cocoon edges and easier installation. Corner anchors are covered with rotomolded polyethylene covers.

High quality panels made of HPL panels are milled to provide a smooth, gently rounded edge. The thickness of the panels varies according to its purpose for floors, roofs, and walls. These panels are connected to steel pipes or profiles with cast aluminum panel clamps or flanges.
