

EXTREME RANGE

YOUR GUIDE TO AN IMPRESSIVE RANGE OF AUSTRALIA'S FAVOURITE PLAYGROUNDS

LOCAL PLAY SPECIALISTS

Omnitech Playgrounds has been a market leader in the playground industry for more than 30 years. From the days when Ausplay equipment dominated the landscape to the present, the name Omnitech has been one you have come to rely on for quality and service. With a nationwide network of distributors and service specialists throughout Australia, you can be assured that our exceptional service and after sales support is close at hand.

With a focus on sourcing Australian materials to manufacture the majority of our products

in house while relying on a trusted group of local specialist manufacturers, Omnitech's priority is to ensure that every product which leaves our Melbourne factory is of the highest quality and durability.

Our multidisciplinary team of playground specialist combine to bring decades of collective experience to every project we undertake, with sales executives, designers, manufacturing specialists, project managers, installers and maintenance team all available to support you through every stage of your playgrounds life cycle.

Nation Wide

As a wholly Australian owned and operated company, Omnitech Playgrounds understands how important supporting local business is. This is why we prioritize sourcing materials and specialist manufacturing services from within Australia. This also ensures we can provide the best quality product, with every Omnitech playground being manufactured in our Heidelberg West factory to the highest quality controls, before being distributed throughout Australia via our national network of experienced distributors.

Omnitech's Extreme range has a proven track record. Having been our most popular product for decades, you can find these durable playgrounds all over Australia and even overseas! Manufactured in Melbourne and featuring 65mm square powder coated

steel posts, injection moulded post caps, vandal resistant stainless steel hardware and Australian made HDPE or rotomolded plastics, every Extreme playground is built to withstand the rigours of daily use.

Modular Flexibility

In addition to its unsurpassed durability and quality, the modularity of Omnitech's Extreme range is what makes it so popular. By using standardized post spacing and deck sizes, we are able to quickly and easily reconfigure existing standard units or make entirely new

custom layouts to suit your budget and space constraints.

This also means that it is easy to expanding an existing Extreme unit or to build a very large unit in stages, adding or updating progressively as your needs and budget changes.

PLAYGROUND CREATION PROCESS

The process of purchasing and installing a playground is easy with Omnitech's experienced team of consultants, designers, and project managers who will guide you smoothly through the process, including the initial consultation, design, manufacture, installation and ongoing and maintenance stages.

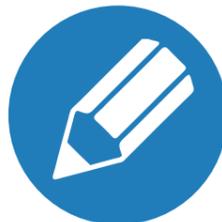

Step 1: Consultation (1 week)

When you contact Omnitech, one of our experienced consultants will visit your site to assess the space available while gaining a clear understanding of your requirements in relation to budget, the age and number of the children using the playground, colour or equipment preferences and landscaping items such as soft fall selection, edging and any pathways or furniture items you require.

Step 2: Design (1-2 weeks)

With a clear understanding of your needs, your consultant will then work with our team of in house designers to create an exciting playground for your site, ensuring that it's engineered to meet Australian Safety Standards while including your preferences for play elements and colors, tailored to your site and budget. You will then be presented with plans and digital renderings for approval to ensure everything is just right before we progress to manufacture.

Fast Track Option

You can also select a playground from our extensive standard ranges in order to simplify and speed up the process, minimizing design time to fast track your project straight to the manufacture and installation stages.

Step 3: Manufacture (4-6 weeks)

After your playground design has been signed off, your project is handed over to our project managers who will schedule your installation and oversee the manufacture of your playground in our Melbourne factory, using locally sourced materials, produced with the utmost care and in house quality management processes to achieve the level of superior durability our name has become synonymous with.

Service and Maintenance

As your all in one playground solution, Omnitech also provide comprehensive after sales support to ensure that all of your needs are covered throughout the life of your equipment, with comprehensive inspections and maintenance services to ensure your playground remains safe, while our local manufacturing means that replacement parts are almost instantly available. We can also offer the option to expand, extend, or refurbish your playground in future, should your needs change.

Step 4: Installation (1-2 weeks)

After manufacture is complete, your playground is carefully packaged and shipped to site where our project manager and installers will safely fence off and oversee the preparation of the site (including removal of any old equipment), prior to commencing installation. Our installer's years of experience ensure that your playground will grow before your eyes faster than you could imagine, with the entire process typically taking only one to two weeks depending on scale and complexity.

Custom Design

The following pages feature a selection of our most popular Extreme units, if these aren't exactly what you're looking for, please contact us. The modularity of the Extreme range means that we can custom design a unique playground for you, incorporating all of your favourite components and activities, whilst meeting your budget and space restrictions.

EXTREME VARIANTS

Extreme Junior + Senior Themed + Custom

Australia's favourite playgrounds, for small and growing children.

Themed + Custom

Extreme flexibility, limited only by your imagination.

Activity Box

The ultimate in climbing challenges and modularity.

Inclusive Play

Interactive and social play for children of all abilities and ages.

Timber

Natural materials to bring you back to nature.

Marine Grade

Unmatched durability for the harshest environments.

THEMED + TOWERS

The flexibility of the Extreme range doesn't end with the ability to expand your playground or integrate other Extreme styles due to its modularity. With the help of Omnitech's skilled team of designers, fabrication specialists and

consultant engineers, the Extreme range can be whatever you want it to be, from themed play spaces to inspire imagination all the way up to soaring towers – or both! Give us a call to discuss your ideas!

Beyond Extreme

Although Omnitech's Extreme provides you a broad range of imaginative playgrounds in virtually any theme or scale you'd like, some projects call for something even more unique. Omnitech can accommodate this need, having spent the past several years developing our capabilities to become the market leading specialist in custom play spaces, we offer a completely customized design, manufacture and installation service limited only by your imagination. For more information please contact us or browse our current 'Inspiration' flyer.

EXTREME JUNIOR

Omnitech's Junior play units have been specifically designed with younger children in mind. Featuring climbing activities which are within reach of small hands, an emphasis on sensory and social play,

and gentle slides, they will challenge ages 2-5 without discouraging their growth. Of course, these units are still great for older children as every Omnitech playground offers fun for everyone!

INCLUSIVE PLAY

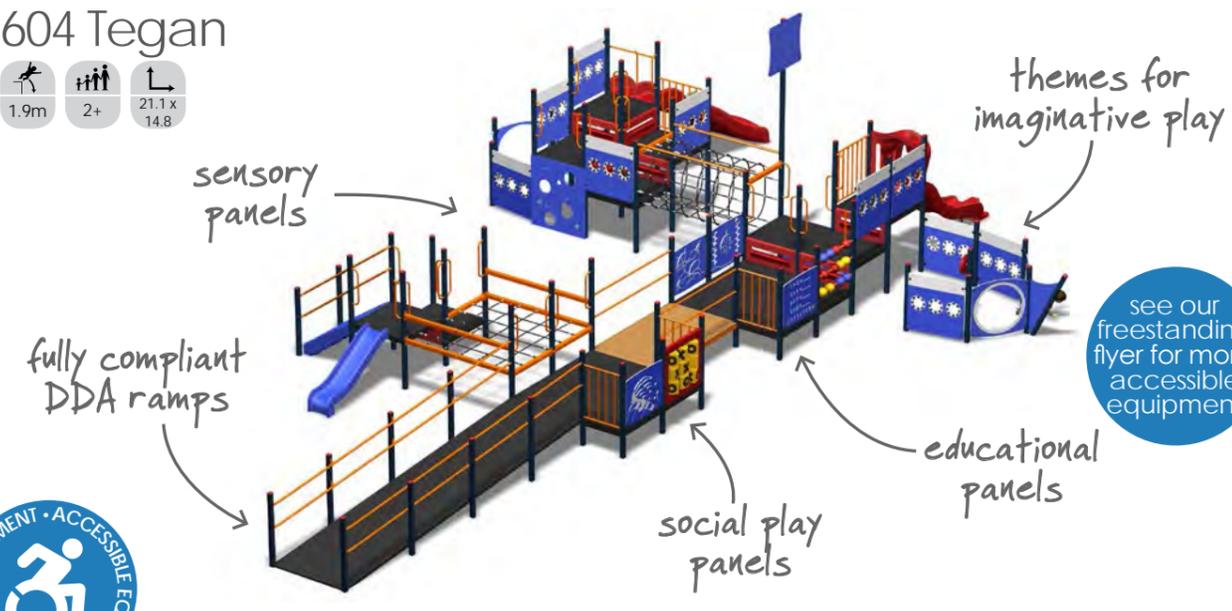

All children have the same desires for fun, excitement, physical challenge, social interaction and intellectual stimulation. These needs are no different for children with disabilities. Omnitech are committed to providing play opportunities that are inclusive for children of all abilities because we understand how important play is as part of all children's development.

Our range of inclusive playground units, activities and freestanding components combine to form the perfect inclusive playground. Our interactive activities

encourage all children, regardless of ability to play together socially, while items such as accessible ramps and rubber access paths enable the inclusion of children in wheelchairs as our sensory equipment engages children with vision or hearing disabilities.

Omnitech Playgrounds understands how important it is to design a playground that doesn't isolate disabled children to one corner of the playground or to one piece of equipment. Our experience and focus ensures that we design playgrounds where children of all abilities can play side-by-side.

ACTIVITY BOX RANGE

Inspired by military style obstacle courses and rock climbing gyms, Omnitech's Activity Box range provides the ultimate climbing challenge. Designed for everyone, from small children all the way up to young adults, the Activity box will challenge all, inspiring creative problem solving and social interaction while maximizing exercise and fun! Inherently vandalism resistant due to its robust and simple structure, the Activity box is suitable for parks, reserves and schools and can be used to expand other or existing Extreme units.

EXTREME TIMBER

Inspired by memories of climbing trees in their youth, Omnitech's Timber Range has been created by our in-house design team to inspire, excite and challenge children of all ages while integrating seamlessly into the natural environment.

Natural materials encourage children to interact, touch, watch and play using their senses to discover new shapes and experiences while the equipment's form challenges them to climb, balance, swing, and slide, allowing for independent discovery and growth.

Timber range is based on the same modular system as the Extreme range, allowing unlimited customization of your playground, with more than 50 exciting play functions to choose from.

Proudly Australian made and built using locally sourced Cyprus Pine decks and posts, galvanized steel stirrups, and the same high quality steel components as the Extreme range, our Timber range will withstand the harsh outdoor environments, providing the strength and durability you have come to expect from any product carrying the Omnitech name.

MARINE GRADE

Omnitech's Extreme range is known for its longevity and durability, but some environments provide such challenging conditions that a little more is required. Our stainless steel Marine Grade range meets this need, having been designed and manufactured specifically for

costal environments, it features lightweight and sturdy aluminium decks and posts, with stainless steel metalwork and fasteners to ensure that it will provide the ultimate in durability, regardless of what Mother Nature throws at it.
